DE IORIO'S

Since 1924

Perfect Pizzas begin with the best dough ...

Since 1924, DeIorio's has combined a tradition of quality and the latest technology to provide products that are naturally good because they're made from high-protein, unbleached flour. No preservatives are added.

Making dough for you.

Which dough is Best For You?

Dough Ball

The dough ball is considered to be the closest product to a fresh dough mix, without going through the entire dough-making process. It makes the most traditional-style pizza.

Pizza Shell

DeIorio's had developed this very high-quality approach to making pizzas twenty years ago. This product is fully pre-stretched or sheeted to the diameter of the pan, oiled on one side, and individually bagged.

Dough Flats

The current generation of pizza preparation. This product has many unique advantages. It takes the traditional flavor of a dough ball and combines it with the convenience of using a dough shell.

Self-Rising Crust

We understand the biggest demands in the food-service industry today include time and labor. Our world moves at a faster pace than at any time in history. This is a perfect solution for the food service industry.
